

Caesarstone

Care & Maintenance

Its hard, nonporous surface makes CaesarStone simple to clean. In most cases, soap and water or a mild detergent is all that is required to maintain its luster. If necessary, **a non-abrasive** cleanser such as Soft Scrub Liquid Gel with Bleach or Comet Soft Cleanser Cream With Bleach can be used. Adhered materials like food, gum or nail polish can be scraped away with a plastic putty knife; any marks left by the blade can be removed with Soft Scrub Liquid Gel. Thoroughly rinse the surface with clean water to remove residue.

Please understand that HONED, TEXTURED and MOTIVO finishes will require more daily maintenance than our polished finishes. Since there is more exposed surface area with honed finishes, metal marks, finger prints and other signs of daily living will show on honed material. Most of these marks can be easily removed with little effort and **non-abrasive** cleaning products such as Soft Scrub Liquid Gel.

CaesarStone prides itself in providing our customers a virtually care-free surface, but as with any product, excessive abuse can harm its finish. With a small amount of care, your CaesarStone surface will look as great as the day you bought it for years to come.
