PICK OF THE WEEK

Quartz VS Quartzite What's the Difference?

Quartz

Engineered Stone made from approx.. 93% natural quartz.

Surface is non-porous and does not need to be resealed.

Quartzite

Natural stone mined from the earth.

Some quartzite looks similar to marble.

True quartzite is not easily damaged by common acidic kitchen products such as juice & vinegar.

WASABI QUARTZITE

Our current lot of Wasabi is beautiful quartzite that has a primary blue-green color with cool waves of silver-gray tones make this stone have a unique "watermark" or "tortoise-shell" look!
